BEST PRACTICES

Best Practice-I

The college had problems in maintaining the database of the students in the recent past. The IQAC of the college in its discussions proposed that there should be a good database management system which will maintain the record of the students with bar codes. The college accepted the proposal and a system was developed to maintain the students' records.

Best Practice-II

The admission procedure of the college was manual prior to 2015-16. This created a huge problem in dealing the admission procedures. The IQAC proposed that the admission procedures of the college should be strictly on online basis from 2015-16. The college adhered to the recommendations of the IQAC and the admission procedure was made online. Moreover the college opted the process of e-counselling from the session 2018-19. Our college being one of the remotest college under the University of Calcutta and the students come from remote areas this process of online admission and e-counselling has been a remarkable achievement.
